I hope you wake up feeling like your old self this am. Hopefully this will be the end of shots for you for a while! Karen and I were doing a walk yesterday and she asked me to follow up on the following items.

Do you think Jack Davis would be willing to be the treasurer for the bid? He and John could be the signers and if you still need me, I could be the emergency fall back. Karen has a lot of projects that require my attention over the next couple of years and we think this might work best for all.

There are some tree wells in back Ralphs that need weeding and some "sappers". If Gilberts team could just pay attention to that on their next regular rounds, that would be great.

With respect to the Citibank tree, I thought we paid for the concrete work and that the tree was from the shuttle trees and since that was where the shuttle was parked, that was acceptable. Karen doesn't want you to do anything us that isnt done for all other property owners. We are happy to pay for what we should.

Last, but not least, have we found anyone that will help us with the removal of the dead tree that is on the airport prop behind ralphs? If that is something we should handle, we would be happy to do that.

Thanks for your help.

Miki
